

Morgan Sully: Phone Recordings

album release notes

Recorded over the course of 6 years in between other performances, tours, club nights, a pandemic and work commitments, these songs share in common the expression of a 'complete statement'.

I really love these collections of songs for their rawness and immediacy, much more direct than my other music.

Phone Recordings is inspired by albums like Prince's posthumous, *Piano and A Microphone 1983* (which has a [beautifully nascent rendition of 'Purple Rain'](#)), Beck's *One Foot in the Grave* or one of Kurt Cobain's [last known recordings outside a Nirvana release, "Do Re Mi"](#) - that particular song is arguably one of the best songs he wrote. Particularly raw and sad knowing it was recorded a few days before he died.

You can get *Phone Recordings* on my Bandcamp [here](#).
